(1888PressRelease) August 02, 2013 - AdiQuity launches its latest product "AppNow", a one click free solution to convert any WAP site into an Android app. Mobile site publishers can now conveniently create app version of their content using the AppNow solution. This will enable mobile users to download and install the app to watch or read the same content as on the wap sites.

"AppNow will allow wap site content to be available on Android app without any effort or cost. It is a golden opportunity for mobile site publishers to attract new users and broaden their overall user base. The highlight being that one can generate additional revenue with the app without investing resources." said Anurag Dod, Founder & CEO, AdiQuity.

The created app can be uploaded on Google Play store or any other desired app store by the mobile site owners where it can be easily found and downloaded by mobile users. Mobile users are preferring apps over wap sites due to multiple app advantages like ease of access and in this case, it also relieves them from the task of remembering site URL's.
